CAREER SUMMARY

Master's graduate in Computer Applications in Artificial Intelligence and Machine Learning with a keen interest in data analysis and problem-solving. Intermediate knowledge of front-end technologies such as **HTML** and **CSS**, along with hands-on experience in **UI/UX design using Figma**. Familiar with **Python programming**, focusing on writing clean and logical code. Enthusiastic about applying technical skills and creativity To real-world projects.

TECHNICAL SKILLS

C | HTML | CSS | Figma | Python | Tableau

EDUCATION

Chandigarh University, Gharuan (Punjab)

Master of Computer Application (specialized in AI, ML)

2023-2025

PROJECTS

- **Project Title: - Virtual Assistant with Home Automation**

Description: - Developed a virtual assistant integrated with home automation features, enabling users to control home appliances using voice commands. The assistant understands natural language and performs tasks such as switching lights and fans on/off, motion detection, and object detection. The system enhances convenience and supports smart home functionality.

- **Project Title: - AI-Based Item Detection System**

Description: - Developed an AI-powered system capable of detecting and recognizing multiple objects in real-time using computer vision techniques. Trained the model using machine learning algorithms and image datasets to ensure accurate item classification. Utilized tools such as **OpenCV** and **TensorFlow** to build and test the system, enabling object identification through images. The system is designed for security applications.

- **Project Title: - Hotel Booking Analysis Dashboard (Tableau Project)**

Description: - Developed an interactive dashboard using Tableau to analyze hotel booking data. The project focused on identifying customer segments including couples, families, and single guests, and examining their booking behaviors. Analyzed booking cancellation trends to understand customer preferences and patterns. Utilized a variety of charts, visualizations, and filters to make the insights easily interpretable for stakeholders, aiding in strategic decision-making and operational improvements.

- **Project Title: - Full Stake Web Development of Poultry Retail Store**

Description: - This project leverages modern web development technologies, including HTML, CSS, JavaScript, and React.js for the front-end, while the back end is supported by MySQL and a XAMPP server. Additionally, JSP (Java Server Pages) is used for login and sign-up functionalities, ensuring security and user authentication.

CERTIFICATIONS

- **Python 3 Programming – University of Michigan**
- **JavaScript and React Native – Infosys**

EXTRA-CURRICULAR ACTIVITIES

- Served as an NSS volunteer during bachelor's degree.
- Participated in and coordinated college sports events.
- Class Representative for 3 consecutive years during bachelor's degree.
- Awarded in a slogan writing competition at the college level.

INTERPERSONAL SKILLS

Teamwork |Time management| Quick Learner| Problem Solving & Result Oriented | Decision Making
